

Onny Vergiean Saputra

Backend Developer

Yogyakarta, Indonesia | 082226729128 | onny133saputra@gmail.com | [LinkedIn](#) | [Github](#)

SUMMARY

Backend Developer experienced in building **scalable internal business systems and automation platforms** using **Node.js, JavaScript/TypeScript, PostgreSQL** and **MySQL**. Specialized in **API development, backend architecture, and system integrations**, translating business workflows into production ready applications. Focused on **clean architecture, scalability, and continuous improvement** through real world production experience.

WORK EXPERIENCE

PT Mitra Berdaya Optima

Yogyakarta, Indonesia

Full-Time Employment, **Backend Developer**

August 2024 – Present

- **Designed and developed** enterprise internal platforms including **CRM, LMS, KPI monitoring, and document management systems** supporting daily multi department operations.
- Built scalable RESTful APIs and database architecture using Node.js, Express.js, PostgreSQL, and Prisma, ensuring maintainable and production ready backend systems.
- Developed backend services and websites for **three additional business brands** under PT Mitra Berdaya Optima.
- **Automated operational workflows and payment processing** by integrating Chatwoot, n8n, WhatsApp API, and Midtrans payment gateway, reducing manual operational processes.
- Deployed backend services on **AWS EC2** and **utilized AWS S3 for file storage**, while managing containerized supporting services using Docker for Chatwoot environment.

PT Mitra Berdaya Optima

Yogyakarta, Indonesia

Contract, **IT Fullstack**

February 2024 – August 2024

- Migrated company website from **WordPress to Next.js**, improving performance and scalability.
- Implemented SEO optimization and collaborated with the marketing team to improve search visibility.
- Achieved **2+ million Google Search Console impressions within 3 months** after migration.
- Built end to end web features and API integrations aligned with business requirements.
- Maintained and optimized website performance and frontend architecture.
